

UNIQUE LIGHTING SYSTEMS, INC.

Always original... Always first.

Unique Product Update

Date: February 18, 2008

Product: Light Bulbs

Unique Lighting Systems is proud to include in all of our fixtures the highest quality low voltage bulbs in the industry. Partnered with General Electric, Ushio and Astrobrite, we are able to also provide these bulbs for replacement purposes also.

Do you know what makes a quality light bulb?

- Proprietary advancements in filament design
- Gas fill technologies
- Refinements in the reflector coating process
- Consistent halogen color
- Color rendition
- Long life hours

Unique Lighting recently added many new bulbs to our selection of available lamps. In addition, we made arrangement with our vendors that have allowed us to lower our prices. Please take a moment to compare these bulbs to any that you may be currently purchasing.

Inferior quality bulbs, in addition to shortened life span, can have the end result of damaging the fixture. Over the years, we have seen these low quality bulbs damage sockets, in effect, reducing the life span of the entire fixture.

Long life spans, stock on hand and reasonable prices, along with the design capabilities of Unique fixtures will convince your contractors to utilize these bulbs.
