

UNIQUE LIGHTING SYSTEMS, INC.

Always original... Always first.

NEW PRODUCT NOTICE

Date: February 28, 2008

Product: 310 Phase-Matic DB

Unique Lighting System's 310 Phase-Matic Subterranean Transformer converts any 12 volt input line into a 120 volt output line. This unit can be used to create a 120 volt power source at any location. Always consult with a licensed electrical contractor and review local electrical codes before installing any line voltage product.

- 310 Watt Step Up Transformer
- Direct Burial
- Composite Material
- Fully potted transformer compartment
- Supplied paraffin wax
- Lifetime warranty

This transformer is especially convenient for isolated locations. Some of the locations this transformer would be useful in are:

- Operating a double insulated pump
- Christmas lights
- Non grounded circuitry

The transformer compartment is fully potted, making it impossible for water to penetrate it. The second compartment is for attaching out-put conduit and wiring the connections. After all connections have been made, use of the included paraffin wax will seal the second compartment.

This product is intended for ungrounded 120 volt circuits only. This product is not ETL listed.
