

UNIQUE LIGHTING SYSTEMS, INC.

Always original... Always first.

Product Update

Date: April 17, 2008

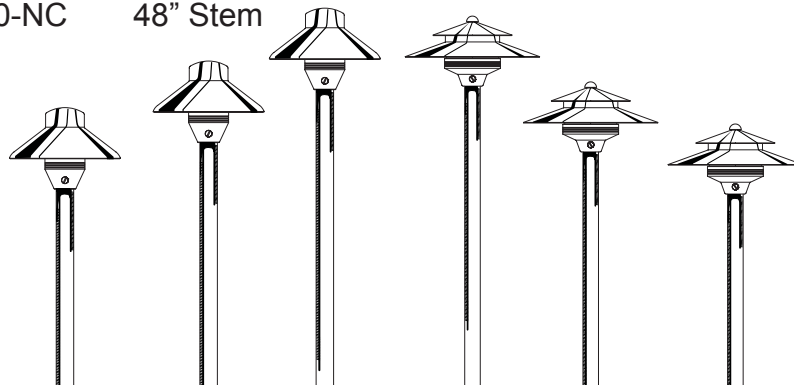

Product: Illuminator 6 & Cambridge

We are pleased to inform you that the above fixtures, members of our Copper Knights series are now available with alternate stem lengths.

When lighting areas that include plants of varying heights to have the ability to utilize enhanced area lights is definitely a bonus. These fixtures will add character to the landscape and help to fill in black holes.

In addition, they can add a dimension similar to moonlighting, casting shadows on the plants and on the ground. We recommend placing these fixtures 6" higher than the plant, and in groups of 3 or 5. These will provide a character element while enhancing the aesthetics of the lighting portrait.
